Summary

Final-year Computer Science student with hands-on experience in **DevOps, Cloud, and SRE practices**. Experienced in CI/CD automation, infrastructure as code, and container orchestration using **Docker, Kubernetes, Terraform, Jenkins, and GitHub Actions**. **Certified Kubernetes Administrator (CKA)** seeking a **DevOps role** to apply and grow skills in real-world cloud environments.

Education

B.Tech, Computer Science Engineering, UPES, Dehradun
CGPA: 8.17/10

Sep 2022 — May 2026

Skills

Cloud Platforms: AWS (EC2, ECS, EKS, RDS, S3, IAM, VPC, ALB, Route53)

DevOps & IaC: Docker, Kubernetes, Terraform, Ansible

CI/CD & Automation: GitHub Actions, Jenkins, ArgoCD

Observability & Security: Prometheus, Grafana, EFK (Elasticsearch, Fluentd, Kibana), SonarQube, Trivy, OWASP

Tools & Build: Git, Nginx, Postman, Docker

Backend & Development: Java, Spring Boot, REST APIs, Microservices, MongoDB

Programming & Scripting: Java, Python, Bash

Experience

DevOps Intern – Xebia (TechNova-CI-CD-Pipeline)

Jun 2025 — Jul 2025

- Automated ECS deployments with GitHub Actions, improving release speed and consistency.
- Provisioned AWS infrastructure (VPC, ALB, ECS, IAM) with Terraform, cutting setup time by **70% (1h → 15m)**.
- Added SonarQube scans and security checks to CI/CD, reducing release issues.

DevOps Trainee Intern – PearlThoughts (Strapi MiniKube Automation)

Jun 2025 — Jul 2025

- Deployed Strapi CMS on Kubernetes (Minikube) with Nginx proxy, sustaining daily requests with high uptime.
- Developed CI/CD pipelines with GitHub Actions, IaC using Terraform, and Bash scripts, reducing provisioning and deployment times by **60% (20m → 10m)**.

Open-Source Contributor – PERN Store (PERN-Store)

Oct 2024 — Dec 2024

- Automated infrastructure with Terraform, reducing provisioning time by **60% (1h → 20m)**.
- Configured Kubernetes autoscaling + monitoring, improving uptime.

Projects

DesignMyDay – Event Management Platform

Mar 2025 — May 2025

- Built a three-tier architecture with separate frontend, backend, and cloud-hosted database layers for modular and scalable design.
- Developed the backend using Spring Boot integrated with MongoDB Atlas via URI connection, enabling secure cloud-based communication.
- Deployed the application on AWS using Docker and Kubernetes, ensuring scalability and high availability under concurrent user load.

End-to-End CI/CD on AWS EKS

2024

- Built IaC with Terraform and ArgoCD for EKS clusters, cutting infrastructure provisioning time by **60%**.
- Deployed and managed Kubernetes workloads on EKS, validating scalability and reliability under increased pod counts.
- Set up an observability stack using Prometheus and Grafana, reducing troubleshooting time.

Tour de Atlantis – Hotel Management System

Sep 2023 — Dec 2024

- Containerized Django backend with Docker and CI/CD, significantly reducing deployment time.
- Supported registered users with role-based access and end-to-end booking workflows.
- Reduced deployment errors through automation and monitoring.

Achievements

- Certifications:** Certified Kubernetes Administrator (CKA) — Linux Foundation & CNCF (2025)
- Contributed **750+ commits** across 25+ GitHub repositories.
